PROFESSIONAL SUMMARY

Senior Fullstack Developer with 11+ years of experience building scalable web and mobile applications across banking, analytics, and industrial sectors. Specialized in React, Next.js, Vue, and Node.js, with a strong track record of delivering production-ready features in Agile environments. Experienced in developing responsive user interfaces, integrating complex backend systems, and collaborating with distributed teams to deliver reliable, high-quality software.

TECHNICAL SKILLS

Frontend: React, Next.js, Vue.js, Quasar, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI

Backend: Node.js, NestJS, Firebase, Laravel, Odoo, ASP.NET MVC, PostgreSQL, REST APIs, GraphQL, Cloud Functions, PostgreSql, MySql, MongoDB

PROFESSIONAL EXPERIENCE

Fullstack Developer

Wimix Solutions | Aug 2025 – Feb 2026

- Built and maintained banking dashboards using Vue.js and Quasar, enabling internal teams to manage financial operations through responsive, component-based interfaces
- Integrated frontend applications with backend services via REST APIs, ensuring consistent and reliable data flow across financial systems
- Collaborated with cross-functional teams in Agile workflows to deliver features on schedule and meet evolving business requirements

Fullstack Developer

Alphababs | Oct 2022 – May 2025

- Developed and maintained multiple analytics platforms using Next.js and Firebase, including Forts, a data-driven system for uploading datasets, exploring insights through interactive dashboards, and leveraging an AI assistant for decision support

- Contributed to a cross-platform mobile application using React Native, enabling real-time asset booking for field teams
- Designed and implemented backend services and Cloud Functions with Node.js and Firebase to support real-time data synchronization
- Worked closely with product and design teams to deliver scalable, user-focused solutions

Fullstack Developer

InformageStudios | Nov 2021 – Dec 2022

- Delivered fullstack features across 6+ client projects in sectors including analytics, pharmaceuticals, and energy
- Built and enhanced web applications using Vue.js and Laravel, focusing on performance, usability, and maintainability
- Developed SEO-optimized applications with React and Next.js, improving visibility and load performance
- Collaborated directly with stakeholders to refine requirements and deliver production-ready solutions

Fullstack Developer

Desoft | Feb 2019 – Oct 2021

- Developed and maintained 8+ enterprise applications using Odoo and React for government and private sector clients
- Built custom modules and user interfaces to extend platform functionality and improve usability
- Participated in the full software development lifecycle, including requirements analysis, development, testing, and deployment

Fullstack Developer

Private Client | Sep 2015 – Dec 2018

- Developed enterprise web applications using ASP.NET MVC and SQL Server for institutional and public sector clients
- Built and maintained fullstack systems, gaining strong experience in backend architecture and database design

PERSONAL PROJECT

Expenses – Fullstack Expense Tracking Application

https://expenses91-opal.vercel.app

- Built a fullstack application using React and Node.js for managing personal and shared finances
- Implemented multi-currency support with custom exchange rate logic and debt tracking with reminders

- Designed role-based access control for shared households and interactive spending visualizations
- Deployed on Vercel with a focus on usability and real-time data handling
